My ears are in heaven when I listen to a piece of this soundtrack. Ever wonder what it'd be like if a Sonic Fanfic came to life, but instead of being a terrible Fanfic, it was god tier, contained original characters, and had such juicily awesome game mechanics and level design that you could truly begin to believe in love after love? (After love... After love... After love...)

I won't spoil the surprise, but suffice it to say, even without the storylines, the three main playable characters are so perfectly different in play style that each time you play through as a character, it feels like a different game. Some of the bosses that challenged you will be a breeze, some that were a breeze, become major threats. Alternate paths, character exclusive levels, Time challenge modes with special levels just to hone your speed running skills.

Did I mention an epic soundtrack? Cause yeah, they got you covered. It's not just good era style music. It's plain out, good music.

The only flaw some people have is subjective: Some people can't stand the voice acting. I for one, after playing through the game twice on adventure mode, feel that the voice acting fits each character perfectly: Even if the characters themselves may sound annoying, or even silly in some cases... it usually comes through as intended.

The one voice I will say is truly excellent, is that of the main Antagonist, and with some of his taunting near the end, I grew to love and hate hearing his voice over the intercom just as much as I loved and hated Handsome Jack.

Buy this game. Buy it for your friends. Buy it for your enemies to turn them into your friends. Buy extra copies on humble bundle just to have it DRM Free. Make sure these Devs know that they did an awesome job.. Before reading, please consider this:

I would wholeheartedly recommend this soundtrack if they fixed the misleading discription. This soundtrack was one of the main reasons I decided to purchase the game in the first place and I think they did an excellent job on it.

ALSO:

If you don't understand what I mean by "audio quality" and "kbps" then you should look it up and enlighten yourself, don't down-vote this review for helpfulness because this isn't about opinion.

Now here is the problem:

The description says that the soundtrack includes "every song in the game at 320kbps CD quality."

These are all the songs that do not meet the advertised quality of "320kbps"

Target World (Shang Mu Academy) -----128kbps
Up the Creek (Jade Creek 1) -----256kbps
Up the Sub (Jade Creek 2) -----256kbps
Pangu Lagoon 1 (English) -----128kbps
Pangu Lagoon 1 (Japanese) -----128kbps
Time Attack -----128kbps
Relic Maze (Extended Mix) -----256kbps
Freedom Planet Theme (Orchestral Remix) -----128kbps
Beta Dragon Valley 1 -----128kbps
Beta Minor Boss Battle -----128kbps
Beta Speed Powerup -----128kbps
Beta Title -----128kbps

The information I am presenting you is FACT. These values were obtained from opening the sound files and reading the detected audio quality. The reason I have zero hours of playtime is simply because I use a different music player than the one on Steam.

If they say this album is 320kbps, then ALL of the songs in it must be at least 320kbps. I will change my review to "recommended" as soon as either the sound quality or discription is fixed.

P.S. If you want a better quality version, you can get it on Bandcamp for a few dollars more.. Very good soundtrack :). 320 KBPS rate goodness

one issue that they only have the beta invincibility theme in not the current one which kinda disappoints

for 2\$ you'd do a nice gesture to the creator. If you ever played Freedom Planet then you MUST have heard this music. It melts my ears (in positive way) everytime I hear it. Also you just can't skip those extras in this sountrack, all these beta soundtracks and thank-you music Woofie has made. Seriously if you bought FP then you just MUST buy the soundtrack!. I love this soundtrack c:. Wonderful soundtrack, worth the \$6.99

waiting for horizon starport and warp sector 320kbps CD quality songs. I have this soundtrack on my phone and I listen to it almost every time. I highly recommenced it! ^_^ . Without a doubt one of the best indie game soundtracks of all time. I mostly recommend it to people that want a way to support the devs and get something small back in return, because afterall you can just listen to the soundtrack for free on youtube.. You can tell people are passionate about their game when their soundtrack is also amazing. Love it.. How do I download this? I bought the DLC and the base game.
Good game though.
